Adding Fractions

$$1) \frac{1}{5} + \frac{2}{4} + \frac{8}{10} = \frac{4}{20} + \frac{10}{20} + \frac{16}{20} = \frac{30}{20} = \frac{3}{2} = 1\frac{1}{2}$$

$$2) \frac{2}{4} + \frac{8}{10} + \frac{1}{2} = \frac{10}{20} + \frac{16}{20} + \frac{10}{20} = \frac{36}{20} = \frac{9}{5} = 1\frac{4}{5}$$

$$3) \frac{1}{2} + \frac{2}{3} + \frac{9}{10} = \frac{15}{30} + \frac{20}{30} + \frac{27}{30} = \frac{62}{30} = \frac{31}{15} = 2\frac{1}{15}$$

$$4) \frac{1}{5} + \frac{1}{10} + \frac{2}{3} = \frac{6}{30} + \frac{3}{30} + \frac{20}{30} = \frac{29}{30}$$

$$5) \frac{1}{5} + \frac{1}{3} + \frac{1}{2} = \frac{6}{30} + \frac{10}{30} + \frac{15}{30} = \frac{31}{30} = 1\frac{1}{30}$$

$$6) \frac{1}{3} + \frac{3}{5} + \frac{7}{10} = \frac{10}{30} + \frac{18}{30} + \frac{21}{30} = \frac{49}{30} = 1\frac{19}{30}$$

$$7) \frac{1}{2} + \frac{1}{10} + \frac{3}{4} = \frac{10}{20} + \frac{2}{20} + \frac{15}{20} = \frac{27}{20} = 1\frac{7}{20}$$

$$8) \frac{1}{3} + \frac{1}{2} + \frac{3}{5} = \frac{10}{30} + \frac{15}{30} + \frac{18}{30} = \frac{43}{30} = 1\frac{13}{30}$$

$$9) \frac{6}{10} + \frac{3}{4} + \frac{1}{2} = \frac{12}{20} + \frac{15}{20} + \frac{10}{20} = \frac{37}{20} = 1\frac{17}{20}$$

$$10) \frac{1}{10} + \frac{2}{4} + \frac{1}{2} = \frac{2}{20} + \frac{10}{20} + \frac{10}{20} = \frac{22}{20} = \frac{11}{10} = 1\frac{1}{10}$$
